

## PERSONAL PROFILE

Name: Mikołaj Mańczak  
Date of birth: 25.01.1994  
E-mail: mikomanczak@gmail.com  
Phone: +48 728 538 201  
Website: <https://mikomanczak.github.io/Portfolio>  
GitHub: <https://github.com/mikomanczak>  
LinkedIn: [www.linkedin.com/in/mikolaj-manczak](http://www.linkedin.com/in/mikolaj-manczak)

## EDUCATION

Technische Universität Berlin  
2013 - today  
Computer Science (Bachelor degree)  
Software development specialization

## SKILLS

Frontend: HTML5, CSS3, Sass, JavaScript, TypeScript, React, Next.js, Redux, Apollo, Service Workers  
Backend: Node.js(Express), Java  
Communication: HTTP, WebSockets  
Web service architectures: REST, GraphQL  
Databases: MongoDB, MySQL  
Version control : SVN, Git  
Testing: Selenium, JUnit, TestNG  
Other tools: Webpack, Babel, npm, Maven, Postman, Jenkins, Chrome DevTools

General Software Development knowledge(requirements engineering, system design methodologies, architecture styles, design patterns, software metrics, verification and validation principles)

General Web Development knowledge:

- performance optimization (caching techniques, reducing HTTP requests, code splitting)
- understanding of cross-browser compatibility issues and ways to work around them
- common practices (A/B testing, user behavior tracking and analysis, search engine optimization)

## EXPERIENCE

Siemens AG  
Mobility Division (Research & Development Team)  
April 2018 - today  
Software Engineer  
working student

- Developing a platform / full stack web application with React & Redux on the frontend, Node.js(Express) on the backend and MongoDB intended to manage quality assurance of safety critical internal software
- Implementing automated regression testing scripts with Java, Selenium and TestNG

Responsible for the entire project including: system design, implementation, verification and validation.

Cubitabo GmbH  
Septemebr 2016 - April 2018  
Scrum Master  
working student

- Facilitating scrum events and methodologies (enhanced by Atlassian's Jira and Confluence)
- Monitoring the development progress throughout each sprint to ensure that all team members understood their tasks and related requirements
- Analysing Google Analytics reports, A/B tests and heatmaps(Visual Website Optimizer) in order to provide statistical insights about the product and user behaviour
- Technical research and roadmapping
- Product management

Cubitabo GmbH  
September 2014 - Septemebr 2016  
QA and Automation Engineer  
working student

- Defining QA standards, procedures and processes
- Developing QA strategy and integrating it into development process
- Implementing scripts to automate regression testing with Java, Selenium and TestNG
