EDUCATION

Technische Universität Berlin
2013 - today

Computer Science (Bachelor degree)
Software development specialization

SKILLS

Frontend: HTML5, CSS3, Sass, JavaScript, React(+Next.js), Redux, Apollo, Service Workers
Backend: Node.js(Express), Java
Communication: HTTP(Fetch, Axios), WebSockets(socket.io)
Web service architectures: REST, GraphQL
Databases: MongoDB, MySQL
Version control : SVN, Git
Testing: Selenium, JUnit, TestNG
Other tools: Webpack, Babel, npm, Maven, Postman, Jenkins, Chrome DevTools

General Software Engineering knowledge(system design methodologies, architecture styles, design patterns, software metrics, verification and validation principles)

General Web Development knowledge:

- performance optimization (caching techniques, reducing HTTP requests, code splitting)
- understanding of cross-browser compatibility issues and ways to work around them
- common practices (A/B testing, user behavior tracking and analysis, search engine optimization)

EXPERIENCE

Siemens AG
April 2018 - today

Software Engineer
working student

Developing a full stack(MERN) application to handle regression testing Selenium scripts(which I also implemented). Responsible for the entire project including: system design, implementation, verification and validation.

Cubitabo GmbH
September 2014 - April 2018

QA and Automation Engineer
working student

Responsible for Quality Assurance and Automation(Java, TestNG, Selenium) while simultaneously holding the position of Scrum Master(enhanced by Atlassian's collaboration suite). Additionally did research, roadmapping and management as I gained experience.
