LinkedIn: www.linkedin.com/in/mikolaj-manczak

EDUCATION

Technische Universität Berlin
2013 - today
Computer Science (Bachelor degree)
Software development specialization

SKILLS

Frontend: HTML5, CSS3, Sass, JavaScript, TypeScript, React, Next.js, Redux, Apollo, Service Workers
Backend: Node.js(Express), Java
Communication: HTTP, WebSockets
Web service architectures: REST, GraphQL
Databases: MongoDB, MySQL
Version control : SVN, Git
Testing: Selenium, JUnit, TestNG
Other tools: Webpack, Babel, npm, Maven, Postman, Jenkins, Chrome DevTools

General Software Development knowledge(requirements engineering, system design methodologies, architecture styles, design patterns, software metrics, verification and validation principles)

General Web Development knowledge:

- performance optimization (caching techniques, reducing HTTP requests, code splitting)
- understanding of cross-browser compatibility issues and ways to work around them
- common practices (A/B testing, user behavior tracking and analysis, search engine optimization)

EXPERIENCE

Siemens AG
Mobility Division (Research & Development Team)
April 2018 - today
Software Engineer
working student

- Developing a platform / full stack web application with React & Redux on the frontend, Node.js(Express) on the backend and MongoDB intended to manage quality assurance of safety critical internal software
- Implementing automated regression testing scripts with Java, Selenium and TestNG

Responsible for the entire project including: system design, implementation, verification and validation.

Cubitabo GmbH
Septemebr 2016 - April 2018
Scrum Master
working student

- Facilitated all scrum processes (enhanced by Atlassian's Jira and Confluence)
- Monitored the development progress throughout each sprint to ensure that project advances and meets specified requirements
- Analysed Google Analytics reports, A/B tests and heatmaps(Visual Website Optimizer) in order to provide statistical insights about the product and user behaviour
- Technical research and roadmapping
- Product management

Cubitabo GmbH
September 2014 - Septemebr 2016
QA and Automation Engineer
working student

- Developed QA strategy and integrated it into development process
- Implemented scripts to automate regression testing with Java, Selenium and TestNG
